# News in RSA-RTE 10.2

updated for sprint 2017.40

Mattias Mohlin, October 2017

#### Overview

©2017 IBM Corporation

2

- Now based on Eclipse Oxygen (4.7)
- RSARTE 10.2 is currently an experimental release!
  - Everything that is present in RSARTE 10.1 is also present in 10.2
  - See the What's New presentation for RSARTE 10.1

IBM Rational® Software Architect RealTime Edition \*\*\* EXPERIMENTAL \*\*\* Version: 10.2.0.v20170918\_1055 Release: 2017.40

- Easier to associate files with special extensions to an appropriate editor
  - Select the file and do Open with Other ...
  - Specify an internal Eclipse editor, or an external program
  - For example, set .tc.js files to be opened with your favorite text editor

Editor Selection	1.1.8	
Choose the editor for	opening x.tc.js:	
Internal editors	External program	15
tex		ß_
Oefault Text Sr	nippet Editor

Browse		
Use this editor for	all 'x.tc.js' files	
<b>V</b> Use it for all '*.js' fi	les	
	ОК	Cancel

- Swapping left and right side when doing textual compare/merge
  - Useful if selecting files so they were compared in the "wrong" order
  - Available for all text files, and also when doing compare/merge on a code snippet within a model

- It's now possible to switch between open editors using Ctrl+E even when the editor area has been split to show more than one editor at the same time
  - Especially useful for users with big screens who often show more than one editor at the same time
  - Tooltip with open editors now appear in the middle of the screen to make it easier to notice
  - Navigation to subsequent editors can now be done using Ctrl+E instead of having to use arrow keys or mouse

- Support for launch groups
  - A new type of launch configuration that can contain other launch configurations
  - Makes it easier to debug applications that require multiple executables to be launched
  - Possible to customize the rules for when and how the contained launch configurations should be launched
  - N.B. CDT previously provided a similar launch group feature, and it is now deprecated

- Terminate and Relaunch
  - The default Eclipse behavior is to always launch a new debug session, when launching from the history in the Debug and Run button menus.
  - Now you can press Shift when launching from the history to automatically i terminate the previous session before launching a new session
  - A new preference Run/Debug Launching Terminate and Relaunch while launching can be set if you always prefers this behavior (without pressing Shift)
- Sorting breakpoints by creation date
  - Useful when there are many breakpoints and you want to see the newest one on top

- Breakpoints now visible in the overview ruler
  - Helps finding the breakpoints in large files
- Smarter Quick Access search
  - Now supports space separated strings
  - Useful if you don't remember the command name exactly
  - Wildcards (\* and ?) can also be used
  - Also possible now to use Quick Access for searching in the Help documentation
  - Other minor improvements (e.g. showing command icons) also make this feature more user-friendly

- Possible to hide the status bar
  - A new command Window Appearance Hide (Show) Status Bar can be used
- (Linux only) Left/Right arrow keys for collapsing/expanding current tree node
  - Same behavior as on Windows
  - Works on GTK+ 3.6 and later
- Easier to copy parts of an entry in the Problems or Tasks view
  - Copy Details in the context menu can be used for copying either only the description text or the resource name

- Easier to filter the Problems and Tasks views
  - Filters can be applied using a toolbar button
  - The Filters dialog itself has also been simplified
- Easier to filter the Project Explorer
  - A new context submenu for setting/unsetting recent filters
  - Note: The command "Customize view" is now called "Filters and Customization"

- Showing projects not in the currently active working sets
  - An "Other Projects" group can be used for showing such projects when working sets are the top level elements

- Copying workspace preferences
  - Can now be done when switching to a new or existing workspace
- Always run in background
  - The preference General Always run in background is now enabled by default. Disable it if you prefer the old behavior of seeing a progress dialog for long-running operations.
- More external web browsers supported on Linux
  - Now support for Firefox, Chrome, Chromium, Epiphany/Gnome Web, Konqueror
- For more information about Eclipse improvements see
  - News in Eclipse 4.7 (Oxygen) <u>http://www.eclipse.org/eclipse/news/4.7/platform.php</u>

#### Perspective Improvements

Eclipse Oxygen now supports showing perspective descriptions in the Open Perspective dialog

- The perspective description is shown by pressing F2
- Helps in particular new RSARTE users in learning the tool
- All perspectives provided by RSARTE now have a description
- **Note:** The perspective "Classic Modeling" has been removed as it was considered confusing to have two different perspectives for the purpose of modeling. The "Classic Modeling" perspective was intended for users used to RSARTE versions earlier than 8.0 and didn't provide any real value for users used to more modern versions of RSARTE. If needed, it is always possible to create a customized version of the Modeling perspective.
